CRAY SURGICAL

# HOLLOWARE
## INSTRUMENTS

This catalogue showcases our extensive range of instruments—available in multiple sizes and variants—tailored to support professionals in delivering exceptional care. Explore innovation, reliability, and craftsmanship in every piece

CRAY SURGICAL

Cray Surgical is a trusted manufacturer of high-quality hospital hollowware and precision dental instruments. All our products are crafted from premium-grade stainless steel, ensuring durability, corrosion resistance, and the highest levels of hygiene.We are proud to serve hospitals, clinics, and dental professionals with a wide range of reliable, performance-driven instruments that meet international standards for medical and dental care. From surgical trays to dental forceps, every product reflects our commitment to quality and precision.

## Our Mission

At Cray Surgical, our mission is to enhance healthcare delivery by providing safe, durable, and innovative medical instruments that empower professionals and improve patient outcomes. We strive to combine expert craftsmanship with modern design to meet the evolving needs of the global medical community.

Note: These sizes are available in all article you just need to replace 'A' with 'B' or 'C' to get the quote for the required article in required sizes. For Example "CS-HA-001" to "CS-HB-001"

# *INSTRUMENTS BOX WITH LID*

Manufactured from high-grade 304 stainless steel, this instrument box provides exceptional durability and corrosion resistance, ensuring optimal protection and sterility for medical and surgical instruments. Its robust construction and smooth finish make it ideal for secure storage and safe transportation within hospitals, clinics, and laboratories. Designed to withstand repeated sterilization cycles, this box is the perfect solution for organizing and safeguarding surgical tools, dental instruments, and delicate medical devices.

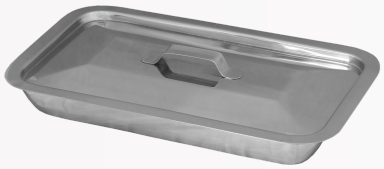

Available Lid Options:

- Simple lid
- Lid with bud (handle)
- Locking lid

# INSTRUMENT TRAY W/W.O LID

The Instrument Tray, made from high-quality 304-grade stainless steel, features a smooth, seamless surface and rounded edges for easy cleaning and sterilization. Built to resist corrosion and withstand repeated autoclave cycles, it offers durable, hygienic storage and organization of surgical, dental, and medical instruments. Available in two variants, with or without a lid, this tray is widely used in operating rooms, clinics, and laboratories to securely hold, transport, and provide easy access to instruments, enhancing workflow efficiency and infection control.

## INSTRUMENT TRAY FOR SYRINGES

Constructed from high-quality 304 stainless steel, this tray provides a reliable surface for arranging syringes and small medical tools. Its low-profile design facilitates effortless cleaning and sterilization. Ideal for ensuring a clean, organized workspace in medical and surgical environments.

(CS-HA-xxx)

(CS-HB-xxx)

## INSTRUMENT TRAY DENTAL

Made from durable 304 stainless steel, this tray is ideal for organizing, holding, and presenting dental instruments, impression materials, or surgical tools. Corrosion-resistant and autoclavable, it's perfect for use in dental clinics, surgical setups, and laboratories.

## CATHETER TRAY

Manufactured from high-quality 304 stainless steel, this catheter tray offers excellent corrosion resistance, easy sterilization, and long-lasting durability. Ideal for organizing, storing, and transporting catheters and related instruments in surgical, urology, and clinical settings. Comes with a secure cover for hygienic handling.

# *STERILIZING DRUM*

The Sterilizing Drum is expertly constructed from premium 304-grade stainless steel, delivering outstanding corrosion resistance and the ability to endure high-pressure steam sterilization. Its sturdy, perforated walls and clip-lock lid allow for uniform steam penetration and secure containment during autoclaving, making it ideal for sterilizing and storing surgical dressings, reusable instruments, towels, and medical devices in hospitals, dental clinics, laboratories, and veterinary settings. The drum's sealed design, carrying handle, and air-vent system ensure safe transport and reliable sterility post-process, supporting infection control and efficient instrument handling across diverse clinical applications

# FORCEPS JAR / THERMOMETERJARS

The Forceps Jar, made from high-quality 304-grade stainless steel, is designed to provide safe, sterile storage for forceps and other small surgical instruments. Its seamless, corrosion-resistant construction ensures durability and allows for thorough sterilization in autoclaves. Commonly used in hospitals, clinics, and laboratories, this jar helps maintain upright positioning of instruments for quick and hygienic access during procedures. The stable base prevents tipping, while the smooth finish minimizes bacterial buildup—making it an essential tool for maintaining organization and infection control in any clinical environment.
